

### We need your help !

For a research project we need to collect WiFi data in this room. To help us, if you have an Android phone, you just have to download an app by scanning the QR code below. Install the app and then follow the following instructions :

- Turn on your location
- Make sure that you have an internet access (WiFi or 4G/3G)
- Fill in the **Column** and **Row** fields with the numbers below
- Press **Start** button
- Leave your phone on the table, precisely on this piece of paper and leave your screen on, please don't lock your phone !
- Wait for as long as you can and then press **Stop**

Thank you for your help !
